## PROFESSIONAL EXPERIENCE

### UX Designer 2022 – Present

Sii Sp. z o.o. | Qiagen contractor

- Developing two design systems: one for the desktop application and one for the embedded software instrument
- Preparing UI for both the desktop application and the embedded instrument, including considerations for accessibility, risk mitigation (medical device), and translations into 15 languages
- Creating usability testing scenarios, conducting interviews, and preparing surveys (both online and onsite at UK and PL labs)
- Conducting interviews with lab technicians, lab operators, scientists, and instrument administrators to better understand their needs and expectations
- Working closely with the Global Partner Support department, which serves as the first line of customer contact, to gain insights into customers' pain points
- Synthesising outcomes and preparing reports, based on which adjustments are proposed to the team
- Preparing formative evaluations in compliance with FDA requirements (summative evaluation is in progress)
- Conducting accessibility audits based on WCAG 2.1 and WCAG 2.2 for both systems
- Design Quality Assurance within every sprint
- Working in Scrum
- Cooperating closely with Developers, Testers, Project Owners and Stakeholders from Spain, United Kingdom and Poland

### UX/UI Designer | 2021 – 2023

American Systems Sp. z o.o.

- Developed two complex desktop applications. The first was designed for administrative staff in the deans' offices of Polish universities, and the second for library use
- Created & modified wireframes along with visual designs including the best and up-to-date UX practices
- Conducted accessibility audit based on WCAG 2.1
- Prepared usability surveys
- Analysed business requirements
- Analysed outcomes from the surveys and incorporated them into designs
- Cooperated closely with Developers and Stakeholders

## UX Designer | 2020 – 2022

Gorilla Group Sp. z o.o.

- Led requirements gathering activities that respond to business goals, user needs, and delivery requirements
- Conducted research, including competitive analysis, user and stakeholder interviews, analytics assessment and benchmark analysis, to define solutions
- Analyzed, synthesized and organized research data into meaningful themes, categories, insights, and recommendations that are actionable
- Created and modified wireframes, site maps, workflows and prototypes
- Design Quality Assurance

Notable brands I've worked with: **General Assembly, Pokemon, Cynosure, Helen of Troy (OXO & Hydro Flask), Unilever, RX Bar, Jins, Watsons, GrabAGun, Silencer Shop, American Hotel Register, Hall Wines, Breakthru Beverage Group, Neta.**

## UX Researcher | 2017

TestArmy Group S.A.

- Prepared scenarios for usability research
- Actively recruited participants based on a target audience
- Conducted usability interviews (face-to-face & remote, desktop & mobile)
- Made reports from research
- Created expert audits (heuristic evaluation & cognitive walkthrough)

Notable brands I've worked with: **Empik, Yves Rocher.**

---

## EDUCATION
